Cal Poly San Luis Obispo
Sep 2008 - May 2013

PROFILE

As a graduate from UNC Chapel Hill's code academy focusing on Full Stack Development, I am well prepared to make a positive impact on your team. Along with my training in web development, I also studied Industrial Engineering at Cal Poly and worked in a professional office environment including management positions. I am a quick learner and am looking for a position that will help to expand my skills while contributing to your company.

WORK EXPERIENCE

Production and Service Scheduler

Shred-Tech   2018-2023

- Managed scheduling of the production of mobile shredding trucks
- Utilized ERP system to issue parts, track labor and subcontractors
- Supervised service work in the South East US, worked closely with customers to repair equipment and provide regular maintenance

Manager

CleanSweep, Inc   2014-2018

- Managed a crew of workers and lead safety meetings
- Maintained repair work orders and invoices for a fleet of 26 trucks
- Oversaw parts and tool inventory and ordering

Lead Planner

Zodiac Aerospace   2013-2014

- Managed two people and the manufacturing components for a major airline
- Conducted a daily shortage meeting and created a revised shortage report for increased comprehension and more efficient meetings
- Signed off on new or updated engineering drawings to confirm that the new parts or changes could be implemented before our ship date
- Promoted from Material Planner to Lead Planner after 4 months of work

---

PROJECTS

PodCentral

React, JavaScript, Node.js, Apollo, GraphQL, MaterialUI, APIs
www.github.com/likearollinson/PodCentral

- Created a web app that allows users to find and create their own podcasts
- Implemented a music player widget with slider, play/pause and jump back and forwards
- Set up Listen Notes API used to populate application with actual podcast data
- Worked with Material UI to create front-end design for application

AppliTrak

HTML, CSS, JavaScript, Bootstrap, Node.js, Express, MySQL
www.github.com/likearollinson/job-application-tracker

- Created a web application that allows users to stay organized while searching for employment
- Implemented calendar from Full Calendar library
- Used GitHub projects kanban board to plan project with team
- Implemented backend functionality
